Dec 1, 2012 See more of #7 on Vine: A: I got it: Trivia Q: CSS3 animation height/width rotating div I have a problem I've been trying to solve, although it's quite possible I'm approaching it in the wrong way, and I was wondering if you could point me in the right direction: I have an animation where the width and height of a div change the coordinates (x,y) of an object within that div. When the width and height reach their max, I need to start again. I can achieve this by using css transitions, and I'm basically using this: @keyframes heightrot { from { height: 0px; } to { height: 700px; } } @keyframes widthrot { from { width: 0px; } to { width: 700px; } } But I also need the div to rotate through an angle, so here's what I've tried: @keyframes heightrot-rot { from { height: 0px; } to { height: 700px; } } @keyframes widthrot-rot { from { width:
