## Autocad 2004 Full Crack 64-bit Vs 32-bit

**Download**

A: Put the required file into a folder called dll in your Program Files. Right-click the icon and select properties. Go to the compatibility tab and select compatibility with the program you are using, if it's 64-bit then select 64-bit and if it's 32-bit then select 32-bit. Now you'll be able to run it from your Program Files folder. You can also run the 32-bit version of the program in a 64-bit version of Windows. Now the program will work just fine. Q: Discount not showing in Woocommerce Orders email I

have a premium WP site with Woocommerce. I want to let users know that they have a new payment method on their order emails. This is the code I used in functions.php: `add_filter('woocommerce_email_order_details', 'new_payment_method', 10, 2);`  
`function new_payment_method( $order, $sent_to_admin ) { $order_id = $order->get_id(); $order_data = get_post_meta( $order_id, '_shipping_method_data', true ); if(isset($order_data) && array_key_exists('discount_amount', $order_data)){ $discount_amount = floatval($order_data['discount_amount']); echo "Discount: $discount_amount"; } return $order; }` The discount field appears in the email, but when I try to update the order in the backend, the discount is still 0. What am I missing?

A: This is working when I added the function below, in functions.php. `add_action( 'woocommerce_order_status_changed', 'new_payment_method' );`  
`function new_payment_method() { global $woocommerce; if ( $woocommerce->cart->get_subtotal() > 10000 ) { echo 'Discount: '. WC()->cart->get_shipping_discount(). ' ' }`
