You are visitor number (0). Siemens Step 7 Professional V6. The SP 5.2 update does not require the previous SP 5.1. Step 7 Professional Plus (System Package) V13.07.2020 updated. Step 7 professional 3.0. The present invention relates to a coaxial cable connector. More specifically, the present invention relates to a miniature coaxial cable connector. Numerous coaxial cable connectors are known. One such connector is shown in U.S. Pat. No. 4,987,711. This connector comprises a housing having a central pin, and a tubular insert surrounding the pin. When installed into an opening in the end of a coaxial cable, the cable is disposed within the insert, and the pin of the connector is disposed in the opening in the cable. While this connector is inexpensive, and is effective, it is not miniature. The present invention provides a miniature coaxial cable connector. The coaxial cable connector includes a body having a first end, a second end, and a bore between the first and second ends. A first guide is disposed within the bore, having a first opening and a second opening. A second guide is disposed within the first guide, having a first guide opening and a second guide opening. A first end of the first guide is disposed in the first opening in the first guide. A first end of the second guide is disposed in the second guide opening in the second guide. A first end of the second guide has an axial bore. A first end of the first guide has a passageway extending therefrom. A first end of the first guide terminates at a first retention portion. A first end of the second guide terminates at a second retention portion. The first retention portion of the first end of the first guide engages the second retention portion of the first end of the second guide, to prevent the second guide from being separated from the first guide. A third end of the first guide is disposed in the axial bore in the second end of the body. A third end of the second guide is disposed in the axial bore in the second end of the body. A second end of the first guide is disposed in the first opening in the first guide. A second end of the second guide is disposed in the second guide opening in the second guide. A second end of the second guide has a passageway extending therefrom. A second end of the first guide has
