===== The KEYMACRO macro can be used to replace the default keyboard macros of applications, while respecting the usual keyboard shortcuts of the operating system. For example, pressing the Meta key (Windows) or the Control key (Mac OS X) can be changed by any macro that uses the KEYMACRO macro, allowing the implementation of advanced keyboard configurations. KEYMACRO is a cross-platform utility, which, when activated in the configuration panel of a program, will automatically replace its keyboard shortcuts, while allowing the keys to be used by other applications. Main features: ===== \* The keyboard macros used by the application are replaced with new macros, which have been defined by you. \* You can define the keyboard shortcuts used by the application, including the shortcut keys used by the different windows. \* It is possible to define up to 32 macros. \* An enhanced interface with beautiful graphics has been included. KEYMACRO supports most of the popular operating systems, including Windows, Linux and macOS. Its latest version supports the following programs: ===== \* Microsoft Outlook (2007 and 2010), \*Microsoft Word 2007 and 2010, \*Microsoft Excel 2010, \*Microsoft PowerPoint 2010, \*Microsoft Access 2010, \*Microsoft Visual Studio 2010 and \*Microsoft Internet Explorer 10 \* Supported programs: ===== \* Microsoft Outlook 2007 and 2010, \*Microsoft Word 2007 and 2010, \*Microsoft Excel 2010, \*Microsoft PowerPoint 2010, \*Microsoft Access 2010, \*Microsoft Visual Studio 2010 and \*Microsoft Internet Explorer 10. \* Keymacro is a cross-platform utility, which can be used on any operating system that is supported by KEYMACRO. Its latest version supports Windows, Linux and macOS. \* This utility is free and has no restrictions. It is therefore completely safe to use, with no risk of being infected with a virus or virus-like infection. \* It is compatible with any other keyboard utilities, including Kboard, Natty and Koversation. \* Supports both the English and Spanish language settings. \* You can select the language in which KEYMACRO displays its messages, by selecting the configuration language in the settings panel of the application. \* It is possible to configure this utility for both keyboard shortcuts and hotkeys, and it can be used with any shortcut or hotkey, including the Control, Alt and Shift keys. \* It can also be used with any language, by using the Language tab in the settings panel of the application. \* Keymacro 45cee15e9a
