MP3Clip X64

Here is a demo of the "MP3Clip": 1. Drag a file to the "Start MP3Clip" button and select the "Splits" or "Merge" function that you want to use. 2. Click the "Start" button and it will open up the dialog box. 3. Select the number of tracks you want to create and the format that you want to save in. 4. The software will ask you to start your mp3 player. 5. You can now go and play your file. There are a few options you can chose from. You can set the file to be split up or merged to the end of the file. You can set the time to be played out of the actual file or out of the extracted file. And you can set the track number to be shown when the split up or merged tracks are displayed. Here is a screenshot of the "Merge" mode: And here is a screenshot of the "Split" mode: And here is a screenshot of the track options: Help/Help file: You can download the full version here.
