KEYMACRO is an all-in-one piano/keyboard/musical instrument recording and real-time MIDI-MIDI-SYSEX-MIDI sequencer, with 16 step arpeggiator, full MIDI, 16 step external sequencer, 8 preset sounds, multi-layer track editing, 4-channel mixer, MIDI learning, 2-track sequencer, auto key repeat, 16 step external drum machine, multi-instrument recording, MIDI sequencer, 8 preset sounds, loop recording, 8 keyboard macros, pre-assign macros, microtuning, and clip recording. How to Use: It's really easy to use - just record your ideas or performances, create layers, use velocity sensitivity, and set key ranges for each layer. As you can hear in the videos, this is a really powerful tool for those that like to record their ideas or performances, and turn them into a track for later manipulation. When recording your ideas/performances, your pre-assigned macros are executed in time to the music (provided you have set up macros to do so). If you are not using any of the 16 preset sounds, you can create your own user sounds and use those as well! You can use the 16 step external sequencer to set up your own playlists with your favorite song(s). You can use the 8 step external drum machine to set up your own playlists with your favorite song(s) as well. You can use the auto key repeat to create a loop recording that is key-dependent (this means that the note played on a given key will play for the entire track, even if you move to another key). You can use the MIDI learning to play along with a track of your choice, just press a key on your keyboard and it will automatically play the corresponding note for you. The 16 step arpeggiator has been set up to pre-assign macros to allow the same functionality as in the keyboard-only version. 2 separate layers: Layer 1 is used for the acoustic piano, and Layer 2 is used for the MIDI keyboard. The piano is very flexible to use. You can use the various macro keys to play/record notes, then perform your chord/note combinations. This is an incredibly powerful feature that anyone who plays piano should have on their MIDI software. The MIDI is very flexible as well. You can set up macros to play/record notes 77a5ca646e
