

Thinix WiFi Hotspot Crack X64

WiFi hotspot is a computer software to share your Internet connection with other devices such as a tablet, laptop and smartphone. To share the Internet connection, you need an appropriate wireless adapter that connects your PC to your Internet service provider. WiFi hotspot software can be used to transform your computer into a WiFi

hotspot. When you run the WiFi hotspot, all the devices within the range of your adapter will be able to access Internet. This allows you to make your Internet connection available for up to 100 devices. If

the devices are within a predetermined distance, you can connect them to the Internet by just configuring the settings on your PC. WiFi hotspot software is easy to use and intuitive. If you want to share Internet connection, all you need to do is run WiFi hotspot and that's it. WiFi hotspot creates a wireless hotspot with a specified name. You can then set

the name of your hotspot, which can be unique for each user. You can also set security and designate which access permissions will be granted to which user. There are

three security types that are available on WiFi hotspot, namely open password, WPA and WPA2.

WiFi hotspot application is very easy to use. You can choose a password for your hotspot and use it when you want to connect to it.

When you are done with your connection, you can disconnect the connection. You can also choose not to display the name of your hotspot or its password in

your device when you connect to it. Thinix WiFi Hotspot is a software product from Xioami. The application is designed to share your Internet connection from your computer to other devices such as a tablet, laptop or smartphone. In order to access the Internet, you need an appropriate wireless adapter that connects your PC to your Internet service provider. WiFi hotspot software can be used to transform your computer into a WiFi hotspot. WiFi hotspot software is easy to use and intuitive. You can choose a password for your hotspot and

use it when you want to connect to it. When you are done with your connection, you can disconnect the connection. You can also choose not to display the name of your hotspot or its password in your device when you connect to it. WiFi hotspot makes it easy to share the Internet connection from your PC to other devices such as tablet, laptop or smartphone. It supports up to a hundred devices in the area of your network adapter. If a number of devices needs

Thinix WiFi Hotspot is a simple to use application that enables you to share your Internet connection by transforming your computer into a WiFi hotspot. To be able to do this, you need an appropriate wireless adapter which you connect to your PC. The application isn't picky as it supports a wide range of devices. With it, you can share your Internet connection with other PCs, tablets, laptops and mobile phones that are in your proximity. Thinix WiFi Hotspot displays you a highly comprehensive interface

with a minimalistic approach. It's ease of use is highlighted by the fact that the application automatically configures itself when you run it for the first time and the process takes just a few seconds. This makes it a very practical utility to have on both vacations and business meetings as it supports up to 100 users. The application enables you to create wireless WiFi and 3G/4G based Internet connections in a jiffy while not neglecting security. You can easily customize the SSID for your hotspot, enable PIN protection, as well as add and

customize the password that grants users access. During its runtime, Thinix WiFi Hotspot constantly displays the status of your hotspot along with various details that do come in handy. From its interface, the application lets you know if your computer meets the required hardware configuration, if the hotspot is active and if any clients are connected. It also tells you your SSID, wireless key, authentication type, if Internet access is allowed and your IP address. Thinix WiFi Hotspot can also be set to automatically begin sharing your

connection immediately after your computer starts. Also, to make it easier to change settings in accordance to the environment you are in, the application enables you to create settings profiles which can be easily switched.

With the above to consider, there is no good reason why you shouldn't try Thinix WiFi Hotspot when you need to create a WiFi hotspot from your computer.
