Disclaimer: All videos uploaded by mobilevshare are taken from our sister-site Xhamster.Q: Flex Mobile 4 Framework: show and hide components I need to make a dialog that is visible or invisible depending on a param "visible" I'm using the Flex framework Mobile 4 and I've tried a lot of components and functions to make it work but none works. Do you know how to make a component visible or invisible with parameter? A: It is quite simple...I did this a while ago for a dialog I'm building: var dialog: Dialog = new Dialog(Dialog.ID, true, true); if (param) dialog.visible = false; else dialog.visible = true; addChild(dialog); The big difference is that your view must be a dialog view, not a component that can be hidden or shown. Q: How do we define objects in python? I have two classes, A and B. B needs to take an instance of A as one of its arguments. Can I define class B like this? class B(object): def \_\_init\_\_(self, name): self.name = name self.myType = None def \_\_repr\_\_(self): return self.name What does object mean in this context? A: Nothing important. It's just a type which is either a class or a function, in your example it's a class. Radiation therapy for cutaneous melanoma: 5-year experience at UCLA. The records of 92 patients treated between 1971 and 1975 were reviewed retrospectively in order to evaluate the effectiveness of radiation therapy in the treatment of cutaneous 3e33713323
