It is an incredible approach to prepare and manage Mac font folder easily and easily. Try this Font Manager. It allows you to arrange and display all the fonts that you have installed on your Mac. You can use it to find out the details of your font, such as manufacturer name, version, weight, size and other data. You can install your font by dragging it to the Fonts folder. To uninstall your font, simply drag it back to the folder. You can even compare a font with a few other fonts. The new ability to compare with the built-in font manager X-Font, is a breakthrough innovation. Y-4 Font Manager is an all-in-one utility designed to organize and manage your fonts. It offers a split window design, so that the first window offers you a list of all the installed fonts. The second window offers a quick preview of all the fonts listed in the first window, so that you can quickly make your choice. All the fonts installed on your computer are listed in the main window, so that you can choose to either preview all the fonts or a subset of them. The application offers you the possibility to rename, delete or add fonts to the lists, as well as to compare the font that you are currently viewing with several fonts. Install, view, and remove fonts All the fonts installed on your computer are listed in the main window. You can choose to either preview all the fonts, or only a subset of them. When you are viewing a font, you can use the options to rename it, delete it or add it to a list. Also, you can check out other fonts that you have installed. By pressing Ctrl+E, you can view the first 256 characters of each font. You can also change the preview text by using the options button. Customization Y-4 Font Manager allows you to create your own font, so you can use your own font instead of the original one. You can even compare it with a few other fonts. You can also change the preview text that you use. Finally, you can save it to a file, to make it available to others. I need to say a few words about its font search function. When installing a font on your computer, you can either drag and drop it, or you can click on the "install" button to install it. In the latter case, you will get a list of all the fonts that can be installed, including the ones that are already
