I use Photoshop to place images in my books as an extra layer to enhance quality, add lettering, etc. For more about this technique, see the upcoming section, "Add some extra-credit texture to your work." Layers When working in Photoshop, the items you place on a layer do not cover each other, nor do they show through each other. It's just you and a picture. The layers that you're familiar with from using paint programs, like Microsoft Paint, are effectively the same — the layers just have a different name. In the following sections, we discuss the difference between a layer and a file. A Photoshop image is composed of layers (see Figure 4-2). You can create one, use a duplicate, or even a master copy (refer to Figure 4-2, top). These layers are hidden from view and covered by the image itself. **Figure 4-2:** You can create and use multiple copies of layers as long as they're not visible. To create a new layer, choose File⇒New from the main menu or press Shift+Ctrl+N (Shift+Option+N on a Mac). When asked what type of document you want to create, select Layers. Photoshop then opens a new document, which is then named lis1 (in the following example, lis1.psd is the name of the file). You can now place things on the canvas and make edits. Figure 4-3 shows a new document with a single layer. **Figure 4-3:** Creating a new layer. A good way to practice with Photoshop is to start with a new layer and add a filter or style to it. We look at both of those steps in the upcoming sections. Adding a new layer in Photoshop You create new layers as part of the New Layer command (Ctrl+N on the Mac). You can have multiple layers, and you can move each one to a different location. For example, if you want to split an image between two layers, you could create a new layer and add images or text, then move them to their new locations. The new layer appears in a new dialog, as shown in Figure 4-4. **Figure 4-4:** Selecting the Layers dialog. You can also choose to select the layer in the Layer dialog box. This takes you directly to the Photoshop Layers dialog box, where

President Obama will nominate a justice to fill the Supreme Court seat vacated by the late Antonin Scalia, clearing the way for his successor to strike a final deal on taxes, health care and other top issues. The designation, to be made public Wednesday, will bring to an end weeks of suspense surrounding an appointment that has alarmed conservatives, who warned that a liberal judge might strike down parts of landmark laws like the 2010 health care overhaul. ADVERTISEMENT The president said he is “now in the final stretch” of choosing a successor, but made no mention of who might get the call. The president’s spokesman said he will nominate “a very talented and qualified judge, hopefully something that is not on anybody’s short list.” The White House will make clear that the president is leaving it up to the Senate to decide the fate of the conservative jurist. Democrats on Capitol Hill lauded the move, but Republicans said there is little to no reason to tip the scales for the next president. “It’s important that the Senate have time to consider this selection and to ensure that this is someone who can provide our country with the great jurisprudence that it so clearly needs,” said Senate Majority Leader Mitch McConnell Addison (Mitch) Mitchell McConnellOcasio-Cortez to voters: Tell McConnell 'he is playing with fire' with Ginsburg's seat McConnell locks down key GOP votes in Supreme Court fight Video shows NYC subway station renamed after Ruth Bader Ginsburg MORE (R-Ky.). “It’s not clear that anybody is going to come to the fore that’s suitable to fill the vacancy.” The president’s pick will likely be someone who fits the mold of previous nominees, one of whom, John Paul Stevens, was revered by both sides of the aisle. Stevens, who retired in 2010, was a traditional conservative, but he also was a respected moderate, particularly on racial matters. ADVERTISEMENT While the nomination hasn’t been made yet, it is thought that Obama is considering liberal federal appeals court Judge Sonia Sotomayor, 67, of New York. A number of Republican senators praised the potential nomination, though some warned it may not address the biggest political issue facing the high court. Reince Priebus, the chairman of the Republican National Committee, called the choice “politically
