
X16 96076 Iso Rapidshare

The link you provided does not allow you to download ISO images for upgrade keys, MSDN keys, product keys for pre-installed media, or enterprise edition... Click Edit to edit and then 'Download' to download the file. It doesn't work and I don't know why. When I click "Run update" I get "Failed to install update [release number]"... I can't download the ISO file for this update because it doesn't seem to accept the downloaded file. Does anyone have a solution to this problem? Is there a way to download an ISO file that works correctly? Or am I using an unsupported tool
