It also comes with advanced features to let you create DVD duplicates without any quality loss. 21 Comments I'm having the same problem, and it would be great to find a solution, because I already bought this in G-shop, and the official site has no more of it available. For example: "1-Click dvd Copy does not work, when I put in the DVD, it only recognizes the audio, but does not recognize the video". Thanks a lot Hey Damian, and apologies for the late reply, but I have no idea how you installed the software. If you used the RAR archive I think you may have to extract the tar.gz file from the archive. I recommend using WinRAR to extract this in order to get the most out of the application. Good evening George, thank you for your question. The application is working perfectly fine, and many thanks for your comment. The scenario is quite the same as your post, i.e. I previously purchased the application and wanted to backup some movies. I extracted the downloaded application from the archive, and noticed that it created 4 folders under C:\Program Files (x86)\1ClickDVDCopy\ in addition to a single folder, C:\Program Files (x86)\1ClickDVDCopy\Activation. Of course, the activation folder contains a file called 1ClickDVDCopyActivator.exe and some unreadable.xml files. My question is: Do I need to be logged in to be able to run the application? If I try running the 1ClickDVDCopyActivator.exe file, it asks for the activation key that I initially used to activate the software; it's not mentioned anywhere that I need to be logged in. So I tried creating a new, temporary key to use temporarily. Strangely, I just now opened up the activation folder again, and the installer asks me for the temporary activation key that I used in step 1. So the key still works. I'm also
