This app contains many features that was never introduced before, specially its words, letters ETC counting system. This app is very easy to use and give its users many accessibility options to customize it. You can view this app on your mobile devices & tablets.Warrior Singer The Warrior Singer () is a West German prototype heavy assault glider, built by German Flugzeugbau GmbH in the mid-1950s. Only one was built, as the only possible customer was the Ministry of the Interior of the Federal Republic of Germany. Design and development The Warrior Singer was a large, luxurious military glider, capable of transporting between eight and twelve people. It was to have been manufactured in three- or four-seat versions, but only the four-seat version was completed. Its tail unit was a two-part, wing-mounted-by-stringer wing, which stretched from the fuselage rear to the end of the pylon containing the fin. The pylon was constructed as a box structure with a teardrop-shaped nose. The glider's fuselage had three areas, the front section, which was oval in cross-section, and two longer, rear sections, which joined to the rear of the front section. The airbrakes, which could be operated independently of one another, were on a single pylon at the front of the nose, with twin wingtip pylons,
