Movie BarCode Generator Movie BarCode Generator is a lightweight and portable application that you can use to create barcodes from video clips and save them as images. It comes loaded with just a couple of options which are intuitive enough to be tackled by all user levels. No setup necessary, besides.NET Framework Provided that you have.NET Framework installed, you don't need to set up anything else. You can copy the downloaded files to a custom location on the disk or on a removable storage device, in order to seamlessly run Movie BarCode Generator on any computer. It doesn't add new entries to the Windows registry or create extra files on the HDD without your permission. Simple GUI and options The user-friendly interface is represented by a standard window that displays all settings provided by the program, where you can indicate an AVI or WMV movie using the file browser, as well as specify the output directory and filename of the new barcode, whether it has the BMP, JPEG, PNG or GIF format. Before proceeding with the operation, you can adjust the image width and height, number of iterations and bar width. Otherwise, you can ask the utility to automatically correct the values to obtain the specified image size. On task completion, you can open the destination directory to inspect the new barcode picture. Evaluation and conclusion As we expected, the tool had minimal impact on the system's performance in our tests, thanks to the fact that it needed a low amount of CPU and memory to function normally. It didn't freeze, crash or indicate errors, remaining stable throughout the entire evaluation. Barcodes were generated swiftly. To sum it up, Movie BarCode Generator offers a simple method for putting together barcode images using movie frames, and it can be used by anyone. Plus, it's free.
