We recommend this tool with some reservations.

1. Field of the Invention The present invention relates to a semiconductor device having a multilayer interconnection structure, for example, a multilayer interconnection structure for a SRAM, which is connected to a contact layer of a silicon-on-insulator (SOI) structure. 2. Description of the Prior Art When a silicon integrated circuit is formed on an SOI structure, the circuit is formed over an insulator and the insulator prevents short circuiting between the active regions of the circuit due to a step existing between the insulator and the silicon substrate. A SRAM formed over an SOI structure is known from Japanese Published Patent Application No. 4-174678. Such an SRAM is described referring to FIG. 10. Referring to FIG. 10, a reference numeral 1 denotes a P-type single crystal silicon substrate. N-wells 10 and 11 and a P-well 12 are formed in the silicon substrate 1. N-type impurities are diffused from the surface
