What's New In?

Work tasks or important events organized and easily retrievable is a goal for many users and in this respect one of the numerous applications created for such purposes can certainly be of assistance. TeamViz is a software solution that uses the well-known Pomodoro technique which will help users manage their activities as efficiently as possible. Organize tasks from a clean and practical interface As soon as the program is installed and started, the nice GUI will greet you and enable you to add new items to the daily list immediately. The main window features two main areas, one in which are displayed details regarding the current date, number of tasks and Pomodoros achieved and another where under 3 columns all the activities are kept. Create and edit tasks, synchronize them and get detailed reports on the spot TeamViz prompts you to log into an existing account or create one on the first run, so you can have all the events kept at hand. By simply typing in the task name in the first column you will have it included in the currently selected list. To add the activity to the category of those that are due today, simply press the small timer that appears when hovering the mouse cursor over the task's name. Moving items to the 'Unplanned Tasks' area and vice versa is possible through simple drag and drop operations. After adding several tasks during the course on one day, you might want to have them synced and you can do this with one click. Those interested in statistics have at their disposal the 'Report' module, where according to the selected date range one can view the completed and discarded Pomodoros and

detailed task information for each entry. An time-saving organizer for daily activities To sum things up, it's safe to say that TeamViz succeeds in providing a means of keeping track of multiple tasks, which can increase productivity and also save lots of time for users who want to become more methodical and efficient in their work.
