During our testing we have noticed that Power Hour carries out a task quickly and provides good audio quality. It leaves a minimal footprint on system resources, so the overall performance of the computer is not affected. The lack of configurable settings makes it an ideal tool for rookies who don't want to spend a lot of time tweaking the playing parameters. On the downside, it would have been useful to see support for volume adjustment options, equalizer, and plugins, just to name a few suggestions. You cannot repeat the current audio selection, play songs in a random order, create and save playlists, and seek for a position in the audio streams Bottom line To sum it up, Power Hour proves to be a basic audio player that comes bundled with limited features. It needs several improvements in the GUI area to make the process more pleasant and intuitive, and advanced features for enhancing its overall functionality. The Setup The appearance We like the simple, straightforward look of the application. There's a thumbnail image of the file you want to play at the left side of the application window. At the bottom, there are buttons for play, pause, and stop; an option to move to the previous or next track; and a button to delete the current file. The interface isn't a pretty thing, though, and doesn't boast any particular features that would be of help to the novice users. The only thing you can
