Q: Lucene.net Indexer, An 'IndexWriterConfig' is required for indexing I am building an app that requires a full text search on a mssql database. The Indexer/Analysis is built as a IShareableObject. The Index is built in a separate library. In addition, the Index is used both by the database and the application and has to be populated on search. At first I gave the Application the Index using contentIndex = await Index.OpenAsync(path, Options); and used the method below to Add to a Document content = await contentIndex.CreateDocumentAsync(doc, dto); I really liked this way as, after putting down the code for an hour to get it to work, after pushing it to production I had not a single problem. However, while testing in debug I started getting this error message An 'IndexWriterConfig' is required for indexing as an object with Collection field

'Indexer.IndexProviders.All' is required. Please set it on index builder before calling 'Index.CreateIndexAsync' I cannot find a way to configure the index, so that it would run. Below is the sample code I used: public async Task AddDocument(string document) { using (var content = Index.Open("/Users/ruge/Projects/apps/index-db/index-db.ts", iwc)) { content.Index.Analyzers.Add("snowball", analyzer); content.Index.Analyzers.Add("min_infix", analyzer); content.Index.CreateDocument(new Document { TermVector = termvector }, new SearchableDocumentArgs() { TermVectors = new List { termvector } }); } } and the the iwc: var iwc = IndexWriterConfig.Create(/* IndexWriterConfig.OpenMode.CREATE */); iwc.IndexReader = (reader = new IndexReader(IndexReader.

, a composer by the name of "James O'Hara" got into an accident with his bike and broke his collar bone. He was then placed in the hospital's very own ward, where the surgeons performed the surgery that kept him alive and it was discovered that his soul was trying to exit his body. He had opened up a portal and that portal led to this world because of an accident that happened 5 years ago. It was later discovered that the soul, of James O'Hara, came to this world and realized that it was not going to get better in this world so he decided to go back to his own world through the portal. Ike swears that he won't talk about the video's that happened 5 years ago, what if he saw a clip, or photos of that accident? In his interview with Hotter and Harder Magazine, Ike talks about the video he got that involved a portal in the scene. We all saw in the background how a portal was opened up. We know that portal is that left of the stairs, that place you can see the edge of the portal. The portal is in the background of the video.

There's something that even the actors didn't know about that video, that they didn't know how they were going to make the video. I think the video was going to be shot differently. So, they shot what they did and then went back to that video to try to fix it. I don't know if they watched the video. I don't think any of them saw the video. But I think they remember something about it and I think part of the music video was the one that was playing in that video that had the drums and the other parts of the music video that they got from that. I'm not sure though. Very interesting stuff. So, if the portal is in the background of the video and your soul is trying to get out of your body, then why do so many feel that the portal isn't in the background of the video? You have to think about it. The portal in the background of the video is in the left hand side and it's a portal on the left hand side and that would be where your soul could come into this world if you're a soul that wants to get out of your body. But, I think it's
