Description. Devexpress 12.2.5 Crack clone selva oxidada. Devexpress 16 crack.. Dexelite XT. Crack for devexpress 16 chthonic. Devexpress 12.2.5 Crack clone selva oxidada download playstore downloadforwindowsfirefoxfirefox. Devexpress 12.2.5 Crack clone selva oxidada.Q: How to set an environment variable in Jenkinsfile to the current directory? I have a Jenkinsfile which checks the current directory, and if it's neither /data/warehouse/gisnor /data/warehouse/raster then runs a script. I'm trying to change the environment variable so that the script runs only when the current directory is /data/warehouse/gis or /data/warehouse/raster Is there a way to do this? Here's the block of code I'm currently using: env.JOB_NAME = "GIS TEMPORARY SCRIPT" node('master'){ // if current dir is neither /data/warehouse/gis nor /data/warehouse/raster, then run the script if ((!fileExists("/data/warehouse/gis") &&!fileExists("/data/warehouse/raster")) || dir("/data/warehouse/gis")!= "/data/warehouse/gis") { sh "" /bin/bash -l -c "cd /data/warehouse/gis/GIS_test || exit 1; echo ""Script Running at /data/warehouse/raster"" > /tmp/gisInfoLog" cd /home/jenkins/workspace/GIS_tests/ /usr/local/bin/gisFixer.sh rm /tmp/gisInfoLog"" } } A: You can use the fileExists or fileRead commands to check the current dir.
