K-Lite Codec Pack Full is a thoroughly tested video codec pack that offers many advanced features and a variety of codecs. Apart from decoding your favorite multimedia files K-Lite Codec Pack Full also works great as a basic audio transcoder. It even includes a small streaming server so you don't need to install a separate server application. Get K-Lite Codec Pack Free and feel the difference! Enhanced video and sound quality in high definition K-Lite Multimedia Codec Pack adds high definition support to several popular media codecs and vice-versa. It also doubles the decoding speed for HD MPEG2 and H.264, MPEG-4 AVC, and VP8 codecs, gives a boost to audio decoding and streaming, and promotes the CPU usage significantly. UltraFastVideoEncoder K-Lite Multimedia Codec Pack gains over 30% additional speed from the video encoder. This is achieved by using the CPU to the maximum extent possible, which results in a significant speed-up for both encoding and decoding. HD Video Quality The advanced video codecs included in K-Lite Multimedia Codec Pack are exceptional in terms of speed and quality, and are fully optimized for Intel iGPUs. HD MPEG-4 AVC, VC-1 and H.264/AVC can be accelerated up to 5 times. They run efficiently on lower-spec PCs (32bit CPU and/or Intel iGPU) and are very light on resources for CPU and memory. Scalable video resizing K-Lite Multimedia Codec Pack is designed to support two types of video resizing: upscaling and downscaling. It even supports a wide variety of input/output formats, including HD, Full HD, standard definition, and Blu-ray. It is also possible to upscale the video quality to higher resolution with smooth quality transitions and speed up to 50% with Intel's turbo boost. SyncSubtitle K-Lite Multimedia Codec Pack allows the user to playback video while listening to audio of any format supported, even those with the same format as the video. SyncSubtitle technology supports MP3, AAC, OGG, WMA, AMR, RA, ReSpeak, and other popular audio codecs. Discontinued Programs & Features Discontinued features and programs are included in many codec packs. K-Lite Multimedia Codec Pack doesn't have any but for a small number

Introduction: In 1969, a brilliant young pilot named Neil Armstrong took a small step into the unknown and became the first human being to walk on the Moon. Fifty years later, the lunar landscape continues to inspire us. And people from all over the world feel an even greater appreciation for the American spirit of exploration that took Neil Armstrong on this historic journey. This project was created in conjunction with the 50th anniversary of the Apollo 11 mission, one of NASA's greatest achievements in human spaceflight. For the second year in a row, we're celebrating the mission's anniversary with
